***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions that are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1, 4-8, 16, 21-23 and 35-46, drawn to an interferometric multiple stage measurement system.

Group II, claim(s) 10, 12-15 and 24, drawn to a heterodyned displacement measuring system.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I is drawn towards an interferometric multiple stage measurement system, Group II is drawn towards a single stage heterodyned displacement-measuring system. There are no heterodyning limitations in Group I and no multiple stage limitations in Group II.
